Práctica Módulo 2 – Primera parte

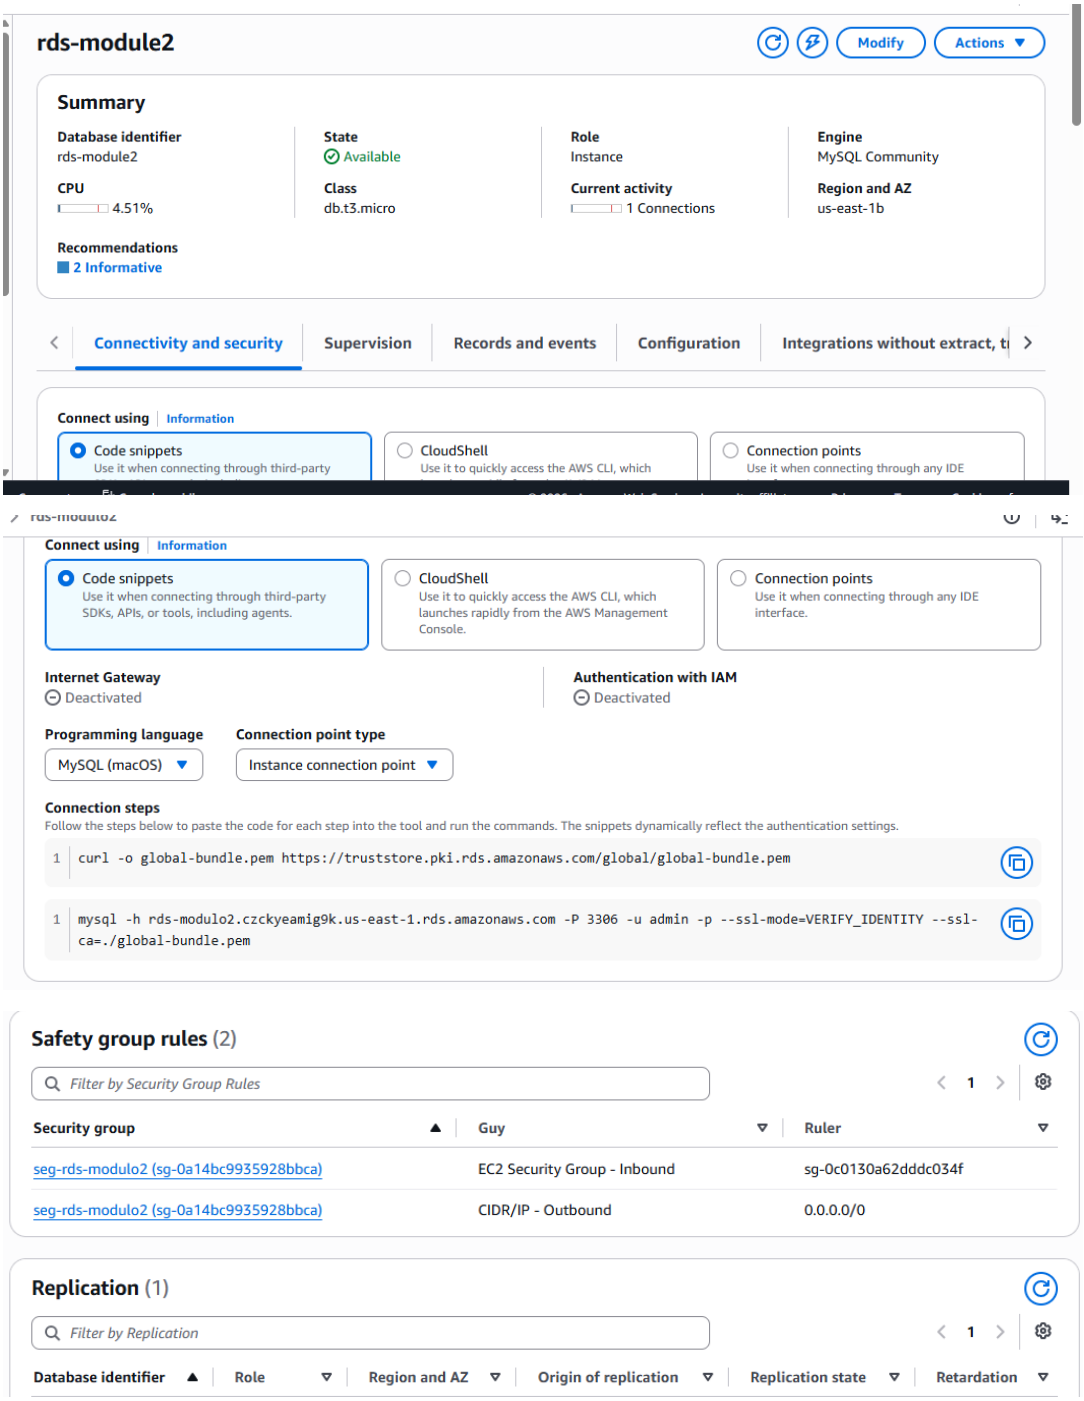

Computación en la nube – AWS (EC2 y RDS MySQL)

Estudiante	Maria Camila Mejia Arango
Región AWS	us-east-1 (N. Virginia)
Instancia RDS	rds-modulo2 (MySQL, db.t3.micro)
Endpoint RDS	rds-modulo2.czckyeamig9k.us-east-1.rds.amazonaws.com
Base de datos creada	laboratorioCamilaMejia

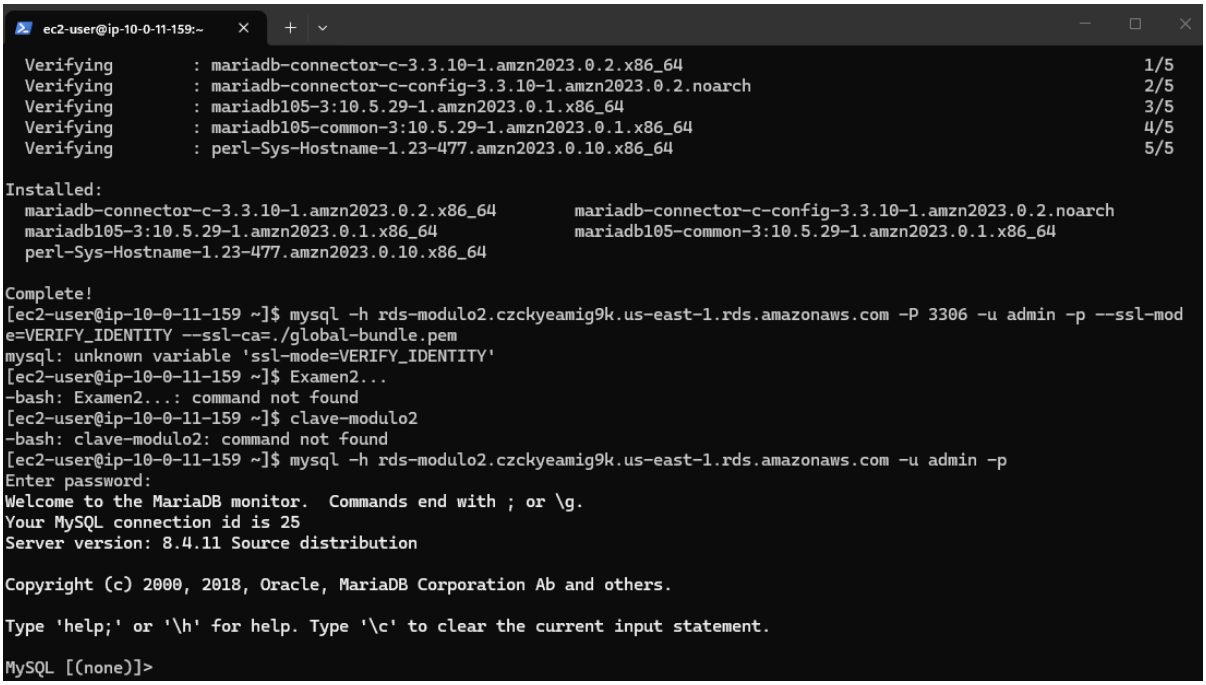

1. Resumen de configuración de lanzamiento de EC2

2. RDS y su grupo de seguridad

3. Conexión a la RDS desde la EC2

4. Comando CREATE DATABASE y SHOW DATABASES

```
Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.

MySQL [(none)]> SHOW DATABASES;
+--------------------+
| Database           |
+--------------------+
| information_schema |
| mysql              |
| performance_schema |
| sys                |
+--------------------+
4 rows in set (0.033 sec)

MySQL [(none)]> CREATE DATABASE laboratorioCamilaMejia;
Query OK, 1 row affected (0.020 sec)

MySQL [(none)]> SHOW DATABASES;
+------------------------+
| Database               |
+------------------------+
| information_schema     |
| laboratorioCamilaMejia |
| mysql                  |
| performance_schema     |
| sys                    |
+------------------------+
5 rows in set (0.001 sec)

MySQL [(none)]> exit
```
